Dear Bill:

My one regret is that I couldn't stay for the balance of the Conference, so as to learn the outcome of the discussions at Harry's and Anne's. John-Joe, Kirk and I had a most pleasant journey back to Memphis. The best part of it was the car trip to Tri-City's airport with Travis Osborne. The 'plane trip was too noisy for three to confer together.

We may not have got up much momentum yet because we are relatively new at all this. We have a tremendous problem to solve and the opposition is powerful and unscrupulous. However, I feel that we have facts combined with sound reason in our favor and that success is only a matter of time. What has been started may prove to be the right fork in the road for mankind.

Two ways in which I might help are 1) I could do a considerable amount of work toward setting up a vasectomy clinic if you feel this is the way to go and the time to do it; 2) If you have no one to whom you've delegated the preparation of your own mailing list for donations to FREED, I will undertake to have the mailing list prepared from letters you've received. Letters of solicitation could then be sent, again with your approval.

Sincerely

Robert Graham
